

SLC Mode Memory Cards

High endurance and efficiency for extreme conditions

Experience unparalleled endurance and efficiency with Transcend's Industrial SLC Mode Memory Cards. Our innovative technology simulates SLC flash for sustained data transmission, while Wide-Temp Technology ensures stable operation in extreme temperatures from -40°C to 85°C.

Guaranteed Performance

Achieve the performance of SLC NAND flash at a substantially lower cost.

Prolonged Lifespan

Up to 100K P/E cycles, suitable for demanding write-intensive applications.

Optimized

Cost-effective

Affordable cost for large-scale embedded deployments.

Featured Products

SD / microSD Card
112-Layer 3D NAND

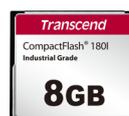

SDC240I / USD240I

SD / microSD Card
MLC

SDC220I / USD220I

CompactFlash Card
MLC

CF180I

CFast Card
MLC

CFX722I
