

5G x AIoT

Connectivity redefined

With Transcend's innovative technologies, our industrial SSDs and DDR5 ECC DIMM solutions seamlessly enhance AIoT and 5G applications, providing superior storage, low latency, and rugged durability. With advanced design elements, they excel in demanding environments, optimizing reliability and performance to meet our customers' business and enterprise needs.

Exceptional Performance

Faster random R/W speeds improve system performance.

Superior Endurance

30μ" PCB gold fingers & anti-sulfur resistors help endure environmental extremes.

Customization Services

Various customizations (Wide-temp., RAID engine, AES) can be implemented to meet specific needs.

Featured Products

PCIe U.2 2.5"

UTE210T

PCIe M.2 2280

MTE720T

SATA III M.2 2242

MTS570T

SATA III 2.5"

SSD470A

DDR5 4800

ECC-DIMM
